4

TITLE: Patient case files

DATES: i 1941-1982.

ARRANGEMENT: Alphanumerical.

DESCRIPTION:

The patient case files were created by the various medical personnel that had contact with the patient: doctors, nurses, pathologists, and sometimes medical insurance personnel. They are the cumulative history of a given patient's stay in the hospital. For many patients there is more than one case file, indicating that a new file was created every time the patient sought medical care from the system.

The case files may include any of the following types of documents: admission and discharge records, condition of admission forms, lab reports, medication records, charts, medical histories, anesthesia records, nurses reports, prescription forms, consent forms, EKG graphs, and summary indexes to the case file. The nurses' reports are the most informative in that they give an hourly update on the patient's status and other data concerning the patient's comments, state of mind, and visitors.

RETENTION AND DISPOSITION AUTHORIZATION:

These records are in Archives' permanent custody.
