3

TITLE: Cervical cancer screening charts

DATES: ca. 1977-1982.

ARRANGEMENT: Alphabetical by patient surname

TOTAL VOLUME: 2.00 cubic feet.

DESCRIPTION:

These charts record cervical cancer screenings held outside the local health department at various community, religious, and professional facilities or organizations. The records document the actual screenings, test results, referrals for additional medical treatment, and counseling given to patients through the cervical cancer screening program. These records include a clinic results form, an informed consent form, and a health record form. Information includes the date, clinic number, case number, patient's name, address, telephone number, whether attended previous state or county cervical cancer screening clinics, date, and location; screener number, name of next of kin, race, education, income, health history, physical description, date of last menstrual period, whether pregnant, contraceptive methods used, date first married, age at first pregnancy, blood pressure reading, breast examination results, pelvic examination results, medicaid number, medicare number, whether referral made to patient's private physician, signed consent for the screening, the diagnosis, the procedures used in the testing, and the recommended treatment.

RETENTION:

Retain 5 years after case is closed.

DISPOSITION:

Destroy.

STATE RECORDS COMMITTEE STATUS:

This retention was approved by the State Records Committee on 03/01/1992.

AGENCY: Weber-Morgan District Health Department

SERIES: 10158

TITLE: Cervical cancer screening charts

FORMAT MANAGEMENT:

The retention and disposition information on this schedule applies to the record copy which can be in any format. The record copy can include different formats. Format management information provided here is for the purpose of managing records that are being either stored by or transferred to Utah State Archives.

Paper: Retain in Office for 5 years after case closed and then destroy.

APPRAISAL:

Administrative Legal

This disposition is based on both the administrative needs expressed by the local health department and the state health department and also meets the statute of limitations requirements. According to UCA 78-14-4 (1991), an action for malpractice must take place within a maximum of 4 years from the act.

SERIES: 25313

3

TITLE: Early childhood development home visitation case management records

DATES: 2001-

ARRANGEMENT: Alphabetical by client's name

ANNUAL ACCUMULATION: 12.00 cubic feet.

DESCRIPTION:

These records document services provided by the local health department under the Early child development home visitation program. This program is offered to all infants who receive Medicaid benefits. It is designed to assist the child and its family in receiving provided community benefits. An assessment is made of the child's health, family life, environment, access to services and other non-invasive services. This assessment is used to determine the child's health and to provide the appropriate referrals in the community. The records include a consent for treatment form, initial home visit assessment form, parental referral forms, and the Ogden/Weber referral telephone number list.

RETENTION:

Retain 6 years after last entry.

DISPOSITION:

Destroy.

STATE RECORDS COMMITTEE STATUS:

This retention was approved by the State Records Committee on 06/01/2003.

FORMAT MANAGEMENT:

The retention and disposition information on this schedule applies to the record copy which can be in any format. The record copy can include different formats. Format management information provided here is for the purpose of managing records that are being either stored by or transferred to Utah State Archives.

1

TITLE: Health care access case management records

DATES: 1990-

ARRANGEMENT: Alphabetical by name

ANNUAL ACCUMULATION:

DESCRIPTION:

These forms document health interviews of heads of households. They are used to assess family needs and to determine their resources need. The forms include demographic information (name of household name, address, case number, location, medical insurance/medicaid number, primary care physician, language preferred, ethnicity, education level, occupation); current medical information of each family member; a listing of any serious illnesses, injuries, hospitalizations (name, condition, and year); the head of household responses on family's access to health care resources; indication of family's special needs, indication of any at-risk conditions; listing of any planned referrals; and a narrative explaining of action guiding the family to appropriate health care resources.

RETENTION:

Retain 4 years.

DISPOSITION:

Destroy.

STATE RECORDS COMMITTEE STATUS:

This retention has not been approved by the State Records Committee.

FORMAT MANAGEMENT:

The retention and disposition information on this schedule applies to the record copy which can be in any format. The record copy can include different formats. AGENCY: Weber-Morgan District Health Department

SERIES: 10160

3

TITLE: High risk infant charts

DATES: 1983-

ARRANGEMENT: Alphabetical by patient's surname

ANNUAL ACCUMULATION: 0.50 cubic feet.

DESCRIPTION:

These medical charts document services provided to infants at high risk for medical, social, or developmental problems. This is a locally funded program where physicians and hospitals refer patients to the local health department. Initially, a public health nurse visits the family and undertakes a complete review to determine additional needs. The infant remains in the program for usually a year but no longer than two years. The infant might be referred to the Infant Development Program (IDP). The records include a nursing service household record form, a developmental chart, nursing notes, permission to evaluate form, and motor skills record form. Information includes names of patient and head of household, address, and telephone number; physician's name, address, and telephone number; listing of all members of household including birth date, sex, marital status, relationship to head of household, occupation or education, immunizations received and diagnosis. The charts also include a summary of findings, recommendations, and services provided.

RETENTION:

Retain 20 years after case is closed.

DISPOSITION:

Destroy provided child has reached the age of 21.

STATE RECORDS COMMITTEE STATUS:

This retention was approved by the State Records Committee on 03/01/1992.

The retention and disposition information on this schedule applies to the record copy which can be in any format. The record copy can include different formats. Format management information provided here is for the purpose of managing records that are being either stored by or transferred to Utah State Archives.

Paper: Retain in Office for 4 years after after case closed and then transfer to State Records Center. Retain in State Records

AGENCY: Weber-Morgan District Health Department

SERIES: 10160

TITLE: High risk infant charts

(continued)

Center for 16 years and then destroy provided child has reached the age of 21.

APPRAISAL:

Administrative Legal

The disposition is based on potential legal problems that may arise as to any treatment given the infant. While UCA 78-14-4 (1991) sets the limit for malpractice action at four years, court decisions such as Foil v. Ballinger, 601 Pac. Rep. 2d 144, Utah Supreme Court (1979) and Myers v. McDonald, 635 Pac. Rep. 2d 84, Utah Supreme Court (1981) have held that the statute of limitations can be extended if discovery of the injury did not occur within the four-year time frame. Should any medical problems occur, they should appear by the time the child becomes an adult.

SERIES: 10161

3

TITLE: Infant development case files

DATES: 1988-

ARRANGEMENT: Alphabetical by patient's surname

ANNUAL ACCUMULATION: 2.00 cubic feet.

DESCRIPTION:

These case files document the participation of children in the federal Handicapped Children's Early Education Program under 34 CFR 309 and 315 (1991). The Infant Development Program (IDP) deals with children from birth to age three. These case files include permission to evaluate form, feeding behavior assessments, reflex maturation assessment form, Denver developmental screening test, individual family service plan form, IDP roll book form, home visit report forms, infant discharge summary, and infant interim summary reports. The information includes the examination date, the child's name, birth date, the diagnosis, the providers' names and telephone numbers, whether the patient communicated with the providers in the last six months, the date and results of the last physical exam, a record of immunizations, vision screening results, hearing screening results, dental screening results, nutritional status, developmental status, language assessment, and daily activities.

STATE RECORDS COMMITTEE STATUS:

This retention was approved by the State Records Committee on 03/01/1992.
