TITLE: Mining records

DATES: 1887-1897.

ARRANGEMENT: Chronological by date filed

DESCRIPTION:

Mining records, which constitute a legal record, are kept for the purpose of monitoring and registering mining claims and operations. Mining records contain notices of location which provide the name of the claim, locators, location, legal description and the mining district; proof of labor registers which record the work performed at each mine annually by each worker; district by-laws; meeting minutes, and district officer election results. The White Canyon Mining District Recorder recorded mining operations in Garfield County and San Juan County in Utah. Until the law changed in 1897, mining districts in Utah had the option of electing their own mining district recorder. Many of the large mining districts, including the White Canyon Mining District, chose to elect their own recorders while claims and other records within smaller mining districts or in unorganized areas were filed with the county recorder. The district recorder ended in 1897 when the law changed and the county recorder assumed sole responsibility for mining records (Laws of Utah, 1897, Chapter 36).
