**TITLE:** Mining records

**DATES:** 1889.

**ARRANGEMENT:** Chronological

**DESCRIPTION:**

In the nineteenth century, miners in local areas organized mining districts to manage mining operations and keep records of claims. District books generally include notices of location, which uniquely identify claims with a name, a description of the location, dates of discovery and recording, and the names of claim owners. In addition to notices of location, the mining records typically also include proof of labor which validate that an owner has worked his claim. They may also include minutes of mining district meetings, district by-laws, and indexes. The Parriett's Placer Mining District is in Wasatch County, and the records were transferred to the Wasatch County recorder's office in 1897.
